

In Opposition of HB 5263AN ACT CONCERNING THE PROCESSING OF RABBITS FOR CONSUMPTION.

As a longtime volunteer at a charitable organization that rescues rehabilitates and adopts rabbits each year I strongly oppose this bill. Rabbits are loving and smart and they are becoming one of our countries most beloved pets. These family members should be treated with kindness and compassion.

A bill like this is a step backward in the human treatment of these delightful companion animals. I strongly urge this committee to not support this bill!
